Dear Steve and Yvonne:

Just a note to let you know I've been promoted and am transferring to Albuquerque, New Mexico in April.

I am enclosing the original tapes of the goose die-off that you lent me. I told Steve he would eventually get them back. (Now he knows what I meant by "eventfully".) Would you please return Greg Johnson's tape to him? Thanks.

The FWS Ecological field office tells me that they are certain the wetland at Americana will be cleaned out this spring/summer. This has taken longer than I wanted--but it has been worth it. I frequently get calls from all over the country asking how we "did it". Many wetlands and much wildlife will benefit from what was done at Americana. You deserve much credit for this.

I can't thank you enough for all the hard work you did during the goose die-off, your helping me with the investigation and all that you have done for wildlife since then. You have set a new standard for wildlife rehabilitation that I hope many will strive to achieve. It was great working with you and getting to know you. Please keep up your good work and don't hesitate to call me or even visit, if there is anything I can do for you. My new phone # is: [REDACTED]

Sincerely,

Cindy Schroeder
Special Agent
